More advanced, detailed and / or customized reports are available upon request

is a comprehensive valuation analysis for the German small / midcap market segment and is published by FCF on a quarterly basis

Selection of Companies

The selection of companies is primarily based on the regulated market of the Deutsche Börse:

- Large cap DAX 40 companies are excluded
- Certain sectors which are dominated by large cap companies or which are of limited relevance for a small / midcap analysis have been excluded (e.g. financials, utilities, automotive manufacturers and specialty sectors such as biotech and healthcare services / hospitals)
- The allocation of companies into a specific sector is based on FCF's understanding & classification of the companies' business models and differs in part from the standard Deutsche Börse sector allocation
- The universe includes companies fulfilling one of the following minimum size criteria: Current market capitalization > EUR 50m, 2023e sales > EUR 50m, 2023e EBITDA > EUR 10m, LFQA Equity > EUR 25m. Smaller companies with a current market capitalization of at least EUR 20m are also included, if they are deemed relevant / representative for their respective sectors. Companies with a current Free Float < 15% have been excluded from the analysis as they are deemed less liquid / more volatile. In addition, certain companies that do not represent their respective sectors have been excluded

Comment

- All four major German indices trade significantly above the low in April 2020 caused by the Covid-19 pandemic. The DAX showed a positive performance of 57.3% over the past 36 months, outperforming the SDAX (+42.2%), MDAX (31.5%) and TecDAX (28.0%). After reaching record highs in November 2021, the indices have sold off sharply, before starting to climb again in the last two quarters
- Investor uncertainty due to surging inflation and interest rates combined with the end of the central banks' APPs¹, the war in Ukraine as well as the recent banking crisis led to a very volatile market development over the past twelve months. While the DAX and TecDAX realized positive performances of 10.4% and 1.2%, respectively, the MDAX and SDAX decreased by 9.7% and 7.5%, respectively, over the last twelve months
- Over the past quarter, all four major German indices increased strongly with positive performances between 13.8% (TecDAX) and 10.1% (MDAX), despite major disruptions such as the collapse of the Silicon Valley Bank and the takeover of Credit Suisse by UBS
